

# **INPOST PARCEL LOCKERS 24/7 FOR VIRTUEMART**

Virtuemart version: 1.1.\*

Plugin is used to integrate e-shop Joomla/Virtuemart  
with InPost Parcel Lockers 24/7.

## BEFORE YOU START plugin installation

- Make the backup copies for the store, files, and databases, for safety reasons.
- Copy all files and directories of the plug-in to the project. The structure of the files and directories in virtuemart plugin reflects the structure of directories in joomla/ virtuemart.
- **Important information!** 2 files of original virtuemart plugin have been changed. You can rewrite them in your project or fill in the changes that are shown here:

[https://github.com/InPost/virtuemart\\_v1/commit/fb2a324a151609956a1c03357722db00a2d25203](https://github.com/InPost/virtuemart_v1/commit/fb2a324a151609956a1c03357722db00a2d25203)

file:

administrator/components/com\_virtuemart/header.php

(lines 338-341 added)

file:

administrator/components/com\_virtuemart/toolbar.virtuemart.html.php

(lines 303-317 added)

- Entitle the file *easypack24.cfg.php* to save data.
- Activate the plugin in virtuemart configuration menu, in ADMIN/CONFIGURATION submenu, SHIPPING tab.
- Check option "The Easypack24 shipping module" and press **SAVE**.
- Add the content from *easypack24.sql* file using phpmyadmin program or console. Remember to replace *#\_YOUR\_PREFIX* field with your prefix set into tables.

## LET'S GET STARTED!

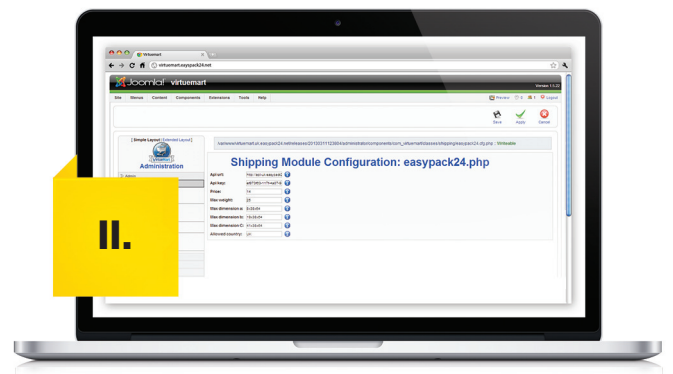

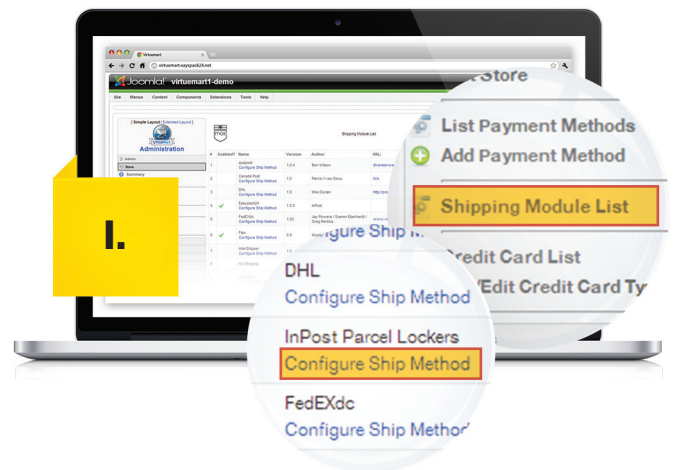

### I. Plugin configuration

- Log into the admin section of Virtuemart.
- Go to *COMPONENTS/VIRTUEMART* menu.
- Go to *STORE/SHIPPING MODULE LIST* tab.
- Click *CONFIGURE SHIP METHOD*. Configuration options for InPost Parcel Lockers will be displayed.

### II. Shipping methods

Complete the data:

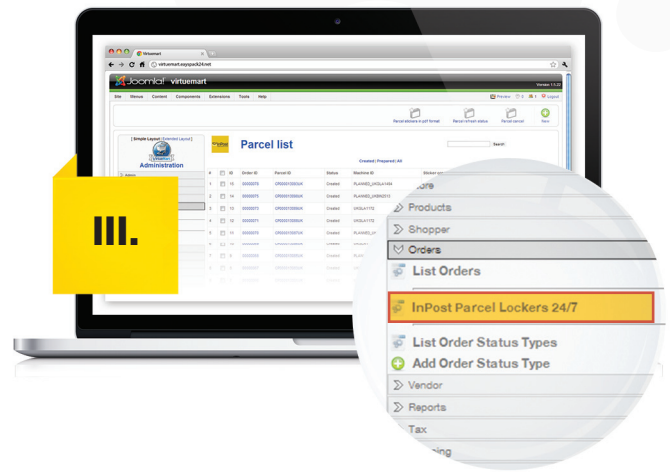

- **Api url** - the address of the API (e.g. <http://api-uk.parcellocker24.net/>), remember to put slash at the end.
- **Api key** - the key to the API.
- **Price** - sending price.
- **Allowed country** - a country where the API is to be active. Only one country can be selected. UK is default.
- **The Sizes** are defined in the following format: *width x height x depth*.
- **Weight and size** - remember the weight and sizes are limited by the lockers size, so you cannot enter the larger parameters than recommended.

### III. List of parcels

As e-store administrator, you can view the list of all created parcels.

- Go to *ORDERS/INPOST PARCEL LOCKERS 24/7* menu.
- Parcel is created automatically after the client make the order with InPost Parcel Locker delivery option.
- Each parcel can also be edited. This is the "parcel update" functionality equivalent, as described in the API documentation in the sec.1.5.8. Parcel update.

### IV. Where your customer can find us?

- **Choosing product**  
If the dimensions and weight of item don't exceed the values defined in configuration section, customer can see InPost Parcel Locker 24/7 as the option for delivery.
- **Selection of the nearest terminal**  
If the city is not on the list, the message "No terminals in your city" should appear, but after pressing the *SHOW TERMINALS IN OTHER CITIES*, the list of parcel machines available in the given country appears. You can also use the special link with maps and locate the nearest InPost Parcel Locker 24/7.
- **Contact data**  
Make sure that email address and mobile phone number of receiver are entered properly. Mobile number must consist of nine digits and "0" cannot be the first digit.

### SHARE YOUR EXPERIENCE WITH US!

1. How do you find manual in general?
2. How convenient is the instruction?  
(where 7=excellent and 1=need lots of improvement!)
3. How likely you are to recommend us to others?  
(where 5=extremely likely and 1=not at all likely)
